File structure

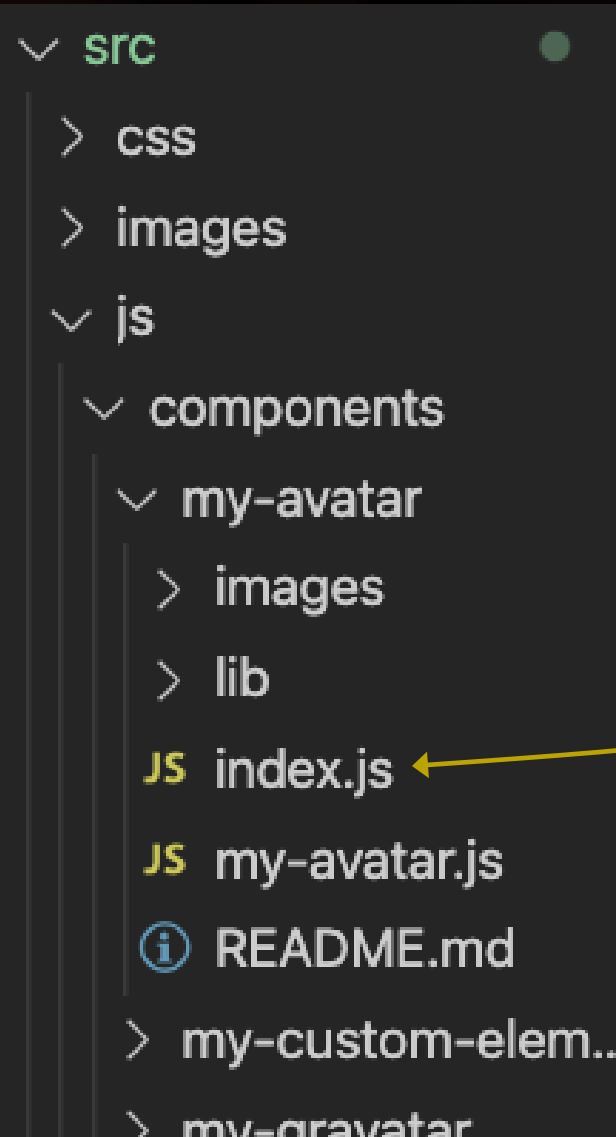

Our components in a subfolder

One component, one folder

dependencies, your own classes

File structure

`../js/components/my-avatar/index.js`

`import './my-avatar.js'`

`../js/index.js`

`import './components/my-avatar/'`

import.meta.url

```
// http://localhost:3000/js/components/my-avatar/index.js
```

```
let pathToModule = import.meta.url
```

```
// http://localhost:3000/js/components/my-avatar/images/default.png
```

```
let path = new URL('./images/default.png', pathToModule)
```

```
...  ...
```

```
./js/components/my-avatar/my-avatar.js
```

 default.png

JS index.js

Using npm modules

```
$ npm install md5
```

```
import md5 from 'md5'
```

The build tool will do magic and bundle the *node_module* packages for you.
