domain-a may not be allowed
to send requests against domain-b

<https://developer.mozilla.org/sv-SE/docs/Web/HTTP/CORS>

❌ Failed to load <http://www.sunet.se/>: Redirect from '<http://www.sunet.se/>' to '<https://www.localhost:1w.sunet.se/>' has been blocked by CORS policy: No 'Access-Control-Allow-Origin' header is present on the requested resource. Origin '<http://localhost:4000/>' is therefore not allowed access. If an opaque response serves your needs, set the request's mode to 'no-cors' to fetch the resource with CORS disabled.

This error message is not available to javascript. For security reasons, javascript will only know that an error occurred.
