WebSocket-API

```
const socket = new window.WebSocket('ws://www.example.com/socketserver', 'charcords')  
const data = {x: 12, y: 14}
```

```
socket.addEventListener('open', event => {  
  socket.send(JSON.stringify(data))  
})
```

```
socket.addEventListener('message', event => {  
  console.log(event.data)  
})
```

```
socket.close()
```
